Team Empathy Map

Foster deeper understanding and stronger collaboration within your team

About this template

Foster deeper understanding and stronger collaboration within your team. This interactive Empathy Map helps you explore your colleagues' perspectives, motivations, challenges, and feelings related to a specific project or shared goal.

Your Team Empathy Map

SAYS

What do they say about the project, tasks, or team dynamics?

Spreadsheet data import should be simple and easy to understand

Transform Maps should reduce errors during data import.”

THINKS

What might they be thinking but not explicitly saying? What are their hidden assumptions or beliefs?

I worry that incorrect data may be imported

I think the data mapping process should be simple

S.Manipriya Team

Our project focuses on importing spreadsheet data accurately using Transform Maps.

DOES

What actions do they take related to the project or team? How do they behave?

Use Transform Maps to map the fields and import the data into the system

Prepare the spreadsheet data and check that all the information is correct before importing

FEELS

What emotions might they be experiencing related to the work, team, or challenges?

I feel a little worried and confused when errors occur during data import

I feel confident and happy when the data is imported correctly without errors

SYNTHESIS AREAS

PAINS

What are their biggest frustrations, challenges, or obstacles?

Preparing and checking spreadsheet data can take time and effortt

“Incorrect field mapping can cause errors during data import

GAINS

What do they need to feel more successful, supported, or motivated? What are their aspirations?

I want a simple and accurate data import process that saves time.

I feel successful when the data is imported correctly without errors
